I work a lot on a freelance/consultant basis. At the end of a project, I must present a detailed timesheet with a description of the work done and the time. This part is always a drag. I often dutifully create a timesheet (this is the rational and efficient thing to do, of course), but I often forget to update it. Or sometimes, I know I'm going to have to cancel some time because I wasn't working on the ground and I still don't feel like doing it. To ease the burden, I started sending emails (to my Gmail account) with a short description and amount of time. I denote the X Hours email. Usually, I also created a label for work X and all the correspondence and notes are so labeled and easy to locate. At the end of the project, if not earlier, search and mold all the X Hours emails, and it gives me a good narrative to work from. If it is a particularly long description, I copy and paste it into the timesheet itself.
